EDUCATION

Texas Tech University

Bachelor's of Science, Computer Engineering

Lubbock, TX

Aug. 2023 - Current

- GPA 3.2
- Expected Graduation: December 2027

TECHNICAL SKILLS

PROJECTS

Development Tools

Visual Studio
IntelliJ
NetBeans
Gradle
Maven
.Net Desktop Tools
Node.js
Git
JavaFX
Overleaf LaTeX Editor

Programming Languages

Python
Java
JavaScript
C#
C++
SQL
LuaScript

Engineering & Programming Projects

Engineering Inventory Management System (*Java, SQL*)
Autonomous Traffic Light System (*C Assembly*)
Raycast-Guided Targeting System (*C#*)
Modular Arm System (*C#*)
DC Motor Driver (*Python*)

RELEVANT EXPERIENCE

BAE Systems Inc.

Fort Worth, TX

Software/Hardware Engineer Intern

March. 2026 - August. 2026

- Engineered a Java desktop application backed by a SQL database that automated engineering inventory management, reducing a manual 3-week workflow to under 5 minutes.
- Automated hardware identification and project inventory comparison, enabling engineers to rapidly identify required equipment and inventory gaps.
- Developed software using Java, C++, and SQL to support engineering applications and hardware integration.
- Supported avionics and defense engineering software and hardware while collaborating with multidisciplinary engineering teams.
- Designed, implemented, tested, and debugged software following professional engineering practices.
- Produced technical documentation and assisted with software validation, troubleshooting, and maintenance.

COMMUNITY INVOLVEMENT

Google Developer Group

Lubbock, TX

Team Member

Jan. 2026 - March. 2026

- Participated in technical meetings and collaborative software development discussions.

HackWesTX

Lubbock, TX

Event Assistant

Sept. 2025

- Coordinated event logistics and contestant support for a university hackathon.

GEAR Robotics

Lubbock, TX

Event Assistant

Jan. 2025 - Aug. 2025

- Assisted with robotics competitions and mentored student participants.
